Off-Duty & Overtime Management Platform

Technology Driven Accountability & Oversight

Do you know how much off-duty your officers work?

Based on a sample of more than 40,000 personnel, the average officer worked more than 500 hours of off-duty, overtime, and special events in 2019.

For a moderately sized agency this equates to more than \$1 million in annual compensation generated directly from off-duty details and overtime.*

* Based on 50 officers charging the average rate of \$40 per hour

Is your agency equipped to collect & distribute money appropriately?

With large amounts of money at stake, law enforcement agencies are tasked with the responsibility of administrative oversight, ensuring that all **jobs, hours, and payments are accurately managed and available for reports & analysis.**

Since 2006, PowerDetails has...

- Scheduled over **3 million** jobs
- Recorded more than **30 million** off-duty hours
- Processed more than **\$500 million** collected from off-duty / overtime jobs

Our mission at PowerDetails is to help law enforcement agencies take accountability of their off-duty details and special events through software solutions that are efficient, accurate, and fair.

The platform was designed to be configurable, which means every PowerDetails site is built with specific features based on each agency's unique rules and policies.

The Benefits of powerdetails

Officer

- Apply to jobs online from any phone, tablet, or computer
- Receive job notifications instantly
- Report hours remotely to get paid faster

Coordinators

- Post and assign jobs quickly and easily
- Reduce the number of phone calls, emails, & text messages
- Automate all billing & invoicing

Command Staff

- Auto-Enforce off-duty & overtime policies to protect against officer fatigue
- Ensure fair & equitable job distribution
- Reduce the risk of liability for the agency

Employers / Vendors

- Request off-duty officers in minutes
- Streamline communications with both the agency & off-duty personnel
- Process invoices directly in the app for swift & easy payments

Reduce Risk & Liability with PowerDetails

Ensure trust & accountability in Secondary Employment.

The PowerDetails platform empowers law enforcement agencies to efficiently administer their off-duty and secondary employment process, ensuring trust & accountability — **from job requests to officer scheduling, from billing to electronic payments, PowerDetails handles it all.**

Equipping agencies with the tools needed to:

- Mitigate the risk of officer fatigue from working too many hours/off-duty jobs
- Maintain oversight and enforce rules to discourage abuse
- Verify compliance and accountability through built-in reporting and data analysis
- Integrate the off-duty and overtime process with existing ERP & on-duty scheduling systems

Efficiency, and transparency are our top priorities.

- Establish Rules & Enforce Policy
- Post Recurring Jobs with One-Click
- Mobile Notifications
- Identify Officer Misconduct
- Create & distribute jobs in minutes
- Automate Invoices for Faster Billing

You have the policies. We make it easier to enforce them.

The PowerDetails platform utilizes a configurable Rules Engine that dictates who is eligible for certain jobs and who is not, makes job distribution fair among officers, protects officers from working too many hours, and protects the agency against liability risks. **The rules engine can automatically enforce hour and job limitations directly within the app without burdening the off-duty or overtime coordinator.**

Identify & Address Officer Misconduct

Whether it's a case of one officer hogging all the good jobs or an officer guilty of multiple no-shows, PowerDetails empowers your administrators with easy-to-use tools to identify and address problems whenever they may occur.

Remove Cash from the Equation

Cash payments are convenient but create numerous opportunities for misconduct and abuse of the system. PowerDetails offers a pre-billing feature that handles all payments electronically before the job even begins.

Record All Details for Future Reports

PowerDetails can track multiple pay rates and accurately records the number of hours worked, equipment / vehicle usage fees, and administrative fees. The system never deletes data, so rest assured that all details will be saved for future reports.
